Experience

Software Engineer (Member Technical)
Automatic Data Processing, Inc. (ADP)

Dec 2025 – Present
Hybrid, Hyderabad, India

- Designed and owned **high-throughput, multi-tenant backend APIs** for a payroll & tax platform processing **3M+ payrolls/month** across **500K+ businesses**; implemented **Redis-based distributed caching** (94% cache-hit rate) for session and config data, maintaining **99.99% SLA** with <100ms p99 latency.
- Built an **end-to-end agentic AI automation platform** using a **Kafka-backed async event pipeline** and FastAPI orchestrator that converts Jira tickets into executable performance-testing workflows — reducing engineer setup time by **90% (5 days → 3 hrs)** and eliminating **60% of manual QA effort** across 4 engineering teams.
- Designed a **scalable microservices orchestration system** using **FastAPI, Kafka (pub/sub), LLMs (RAG + MCP)**, Redis message queues, and validation pipelines to transform unstructured inputs into structured API workflows with **idempotent execution**, reducing manual effort by **60–80%**.
- Implemented **distributed rate limiting** and **horizontal scaling** strategies for payroll API fleet; introduced **dead-letter queue (DLQ)** handling in Kafka consumers and **event-driven async processing** to improve fault tolerance and throughput by 40%.
- Tech Stack:** Node.js, FastAPI, Python, JavaScript, React, Kafka, Redis, SQL, REST APIs, Microservices, LLMs, MCP, RAG, Docker, Jenkins, GitHub, Splunk, Dynatrace

Software Engineer Intern
Automatic Data Processing, Inc. (ADP)

July 2025 – October 2025
Hybrid, Hyderabad, India

- Engineered and deployed a **horizontally scalable full-stack portal** (ASP.NET Core + React.js + **Redis caching** + MS SQL) serving **10K+ daily requests**; improved system scalability by **35%** and reduced DB query load by **60%**.
- Automated complex **cross-service data synchronization workflows** via external REST APIs and **AWS (S3, Lambda)**, reducing manual effort by **90%** and cutting processing time from hours to **10 minutes**.
- Enhanced data-entry workflows using **address autosuggestion, server-side pagination, and debounced API calls**, improving page load speed by **45%** and data accuracy by **80%**.
- Tech Stack:** C#, ASP.NET Core, React.js, MS SQL, Redis, EF Core, Dapper, AWS (S3, Lambda), REST APIs, Agile

Skills

Programming Languages	C++, C#, Java, Python, JavaScript
Backend & Systems	Node.js, ASP.NET Web API, REST APIs, Distributed Systems
Databases	SQL Server, MySQL, MongoDB, Redis
DevOps & Infra	CI/CD, Jenkins, Docker, AWS, Kafka, Performance Testing
Frontend	React.js, HTML, CSS
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks
AI (Applied)	Generative AI, LLMs, RAG, Agentic Workflows

Projects

DocuSense PDF Chat-bot | *Python, LLMs, RAG, LangChain, FAISS, Streamlit, Docker*

Jun 2024 – Jul 2024

Deployed Link - GitHub (Personal Project)

- Built a **RAG-based conversational system** with for low-latency document querying at scale.
- Designed a **FAISS-based retrieval pipeline** for efficient similarity search; optimized chunking and indexing strategy, reducing query latency by **25%**.

KalpChitra.AI | *React.js, Python, Stable Diffusion, GPT-3, Computer Vision*

Mar 2024 – May 2024

Deployed Link - GitHub (Project Exposition '24)

- Built an **AI image generation platform** using Stable Diffusion and GPT-3 with a **Kafka-backed async inference queue** to decouple requests from GPU processing.
- Designed inference pipeline with **async processing** to reduce latency and handle burst traffic; added multilingual support, improving accessibility by **40%**.

Achievements & Publications

- Ratings:** Solved 600+ problems; achieved **5 on CodeChef** (Rating: 2003) and **LeetCode Guardian** (Rating:2166).
- Apr 2024:** Published **2 patents** (including **utility** and **design** patents) in AI and healthcare technology, authored **7+ IEEE-SCOPUS research papers** and received the **Best Paper Award** at the **CCICT'24** IEEE Conference.
- 2024: Academic Topper** (Computer Science), Chandigarh University.

EDUCATION

Bachelor of Engineering, Computer Science
Chandigarh University, Mohali, Punjab

Aug 2021 – May 2025
CGPA: **8.9/10**
